

# SEAT Cordoba II (2002-2009) Air Filter Replacement

Replace the air filter of a 2002-2009 SEAT Cordoba II.

Written By: Jonatan M

**TOOLS:**

- [New Item](#) (1)

**PARTS:**

- [New Item](#) (1)

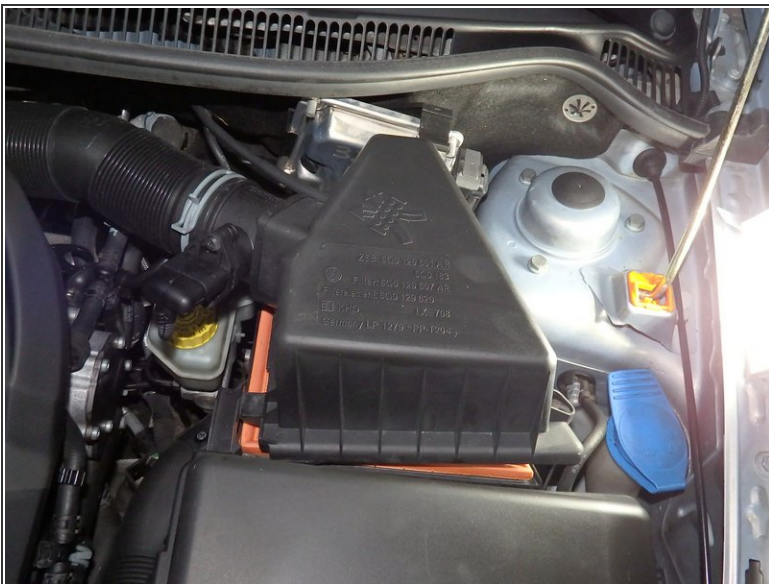

## Step 1 — Remove the two indicated screws

- Unscrew the two phillips head screws. Use the reversible screwdriver that came with the car.

## Step 2 — Open the cover

- Pull the cover up and slightly to the right.
- Here we have to replace the filter. Lift the filter up. It comes off without difficulty.

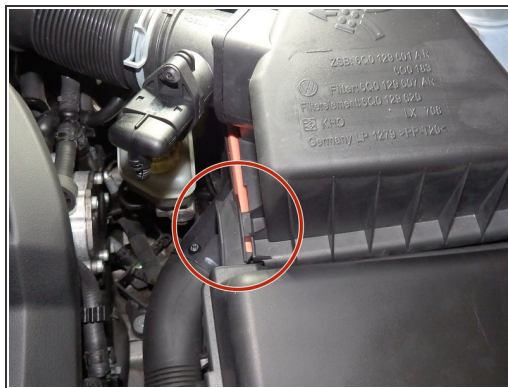

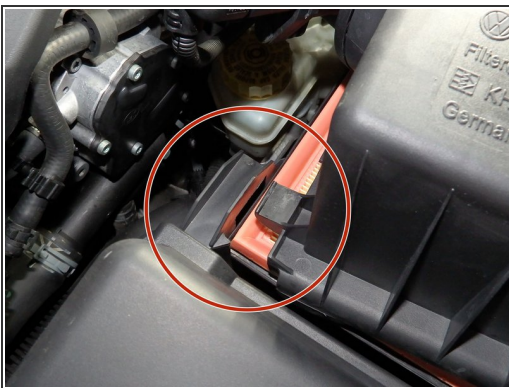

### Step 3 — Clean and replace

- Clean all of the rubbish and insects that are inside.
- Place the new filter, fitting the rubber contour with the gap.

### Step 4 — Replacing the cover and the screws

- Fit the two tabs in their places.
- Once you've done that, put the two screws into their places and tightly screw them in. Finally, check to see that they are completely screwed in.
