

# AWEI BT Earbuds & Receiver Teardown

Separate Earbud Ends & Separate Receiver For Repair on AWEI Bluetooth Earbuds

Written By: fugitiveALiEN

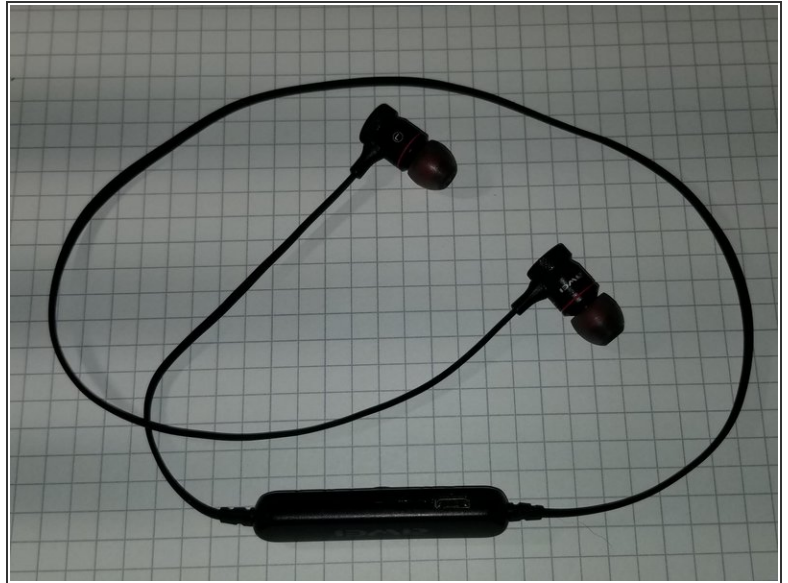

## TOOLS:

- [Slip Joint Pliers](#) (1)
  - [Small Vise](#) (1)
-

## Step 1 — Earbud Dissassembly

- Remove Earbud Cushion

## Step 2 — Secure Earbud for Separation

- Secure Earbud End (eg:Vice)

### Step 3 — Separate Earbud Sections

- Using Pliers Gently Twist & Pry Away Sections, Do Not Twist more than 3-4mm

### Step 4 — Inspect Separated Earbud Internal Wiring

- Inspect Earbud Wiring

## Step 5 — Separate Receiver Housing

- Using a small pick or pry tool, separate Receiver Housing. Each side is secured by 3 small fragile tabs. Use the space near the micro USB opening & carefully pry to separate the 3 tabs on the opposite side.

## Step 6 — Inspect Receiver Internal Wiring

- Carefully Separate the PCB to inspect the headphone's left & right earbud wiring. Cleaned up any broken connections by de-soldering, re-tinning wires & re-soldering to the PCB. Each side is labeled L + L - and R + R - the colored wire is positive and the bare wire is negative.
- Assemble Unit in reverse order.
