Step 1 — Remove the back panel

(i) Before you begin, be sure to turn off your laptop and unplug it from the outlet.

- Use a Torx T5 driver to unscrew the eight screws securing the back panel.

- Use a spudger to pry up and loosen the back panel.

- Lift the back panel up slightly from the non-hinged edge.

- Pull the back panel away from the hinged edge, wiggling it back and forth to loosen the clips.

- When the back panel clips are free, remove the back panel.

Step 2 — Remove the battery

- Disconnect the cable from the battery by pulling the connector towards the battery.
  ⚠ Pull parallel to the battery, not straight up.

- Remove the four screws (M2 x 2) securing the battery.

- Remove the screw (M1.6 x 4) securing the battery.

- Remove the battery from its recess.

Step 4

- **7-** Disconnect the antenna cables from the motherboard.

- **8-** Remove the four screws (M2.5 x 4) that fix the hinges of the screen.

  - **9-** Place the back of the computer screen on a clean and level surface, then open the computer at a 90-degree angle.

  - **10-** Gently slide and lift the screen off the rest of the computer.

To reassemble your device, follow the instructions in reverse order.
