# INTRODUCTION

Very simple instructions to open the pad

## TOOLS:

- [T6 Torx Screwdriver](#) (1)
-

## Step 1 — Remove battery and triggers

- By pushing with your thumbs, remove the cap from both triggers.
- remove the battery

## Step 2 — Open the pad

- Locate the four screws
  - Two are located at the end of handles
  - Two are hidden by the label behind the battery
- Remove the four T6 Torx screws
- Carefully unclip both sides. It's quite easy and requires no additional tools.
- Separate the two sides, paying attention to the flex cable.

To reassemble your device, follow these instructions in reverse order.
