INTRODUCTION

Use this guide to replace the earpads of Beats solo 3.

In many situations, the earpads of Beat solo 3 would be broken and smelly after a long time because people often wear them during sports. When people know how to replace the earpads, they can save money and have a better user experience.

TOOLS:

[Halberd Spudger](#) (1)

[Fletching glue](#) (1)

PARTS:

[Beats Solo 2/3 Earpads](#) (1)

[Beats Solo 2/3 Earpad Cushion](#) (1)

Step 1 — Earpads

- Use a halberd spudger to create a gap between the earpads and the main body.

Step 2

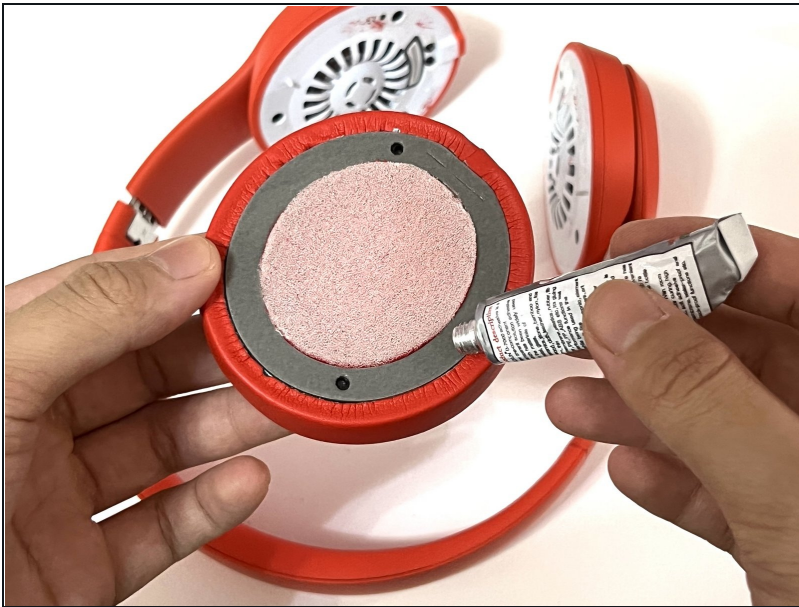

- Peel away the earpads from the headphone earcups.
- ⓘ Be gentle when separating the earpads from the main body. Too much force may damage the main body.

Step 3

- Remove the black tape with your hands.
- ⚠ Be sure to clean the black tape thoroughly, as uncleaned tape can hinder the adhesive of the new pads.

Step 4

- Spread a thin layer of glue around the grey perimeter of the new earpads.
- ⓘ Don't put too much glue on or it will spill out and make the earpads dirty.

Step 5

- Install the new pads.
- ⓘ Be sure to position the earpads properly on the earcups before adhering.
- ⓘ The pads may take a minute to stay together, be patient.

To reassemble your device, follow these instructions in reverse order.
