INTRODUCTION

Hello, today we will begin your repair of The Astro A50 Headset (2019). The most likely reason for you needing to repair this headset is either rage-quitting a game or simply your battery died & needs replacing. We did some searching on the web and couldn't find any generous guides on how to repair. Just have to play harder so you don't have to worry about other kinds of repair on this headset. There aren't many manufactured defects in the product meaning the battery should be your only fix needed. So today we will help you change your battery of an Astro A50 (2019). Hopefully, this guide helps you now & in the future.

TOOLS:

[Phillips #00 Screwdriver](#) (1)
[iFixit Opening Tool](#) (1)

PARTS:

[Astro A50 Battery](#) (1)

Step 1 — Battery

- Remove the right side ear cushion by pulling toward you on the top tab.

Step 2

- Remove the speaker filter by using a prying tool and peeling it off.
- Work your way around the filter until it comes off.

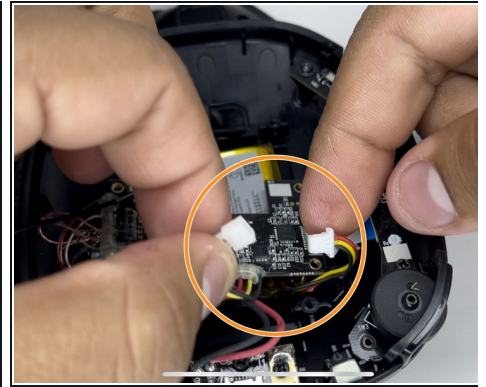

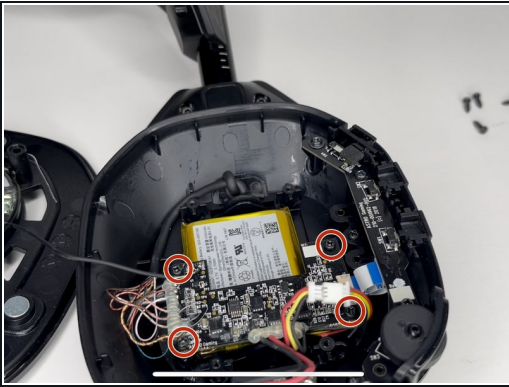

Step 3

- Remove all four 1.5 mm screws using the Phillips #00 screwdriver.

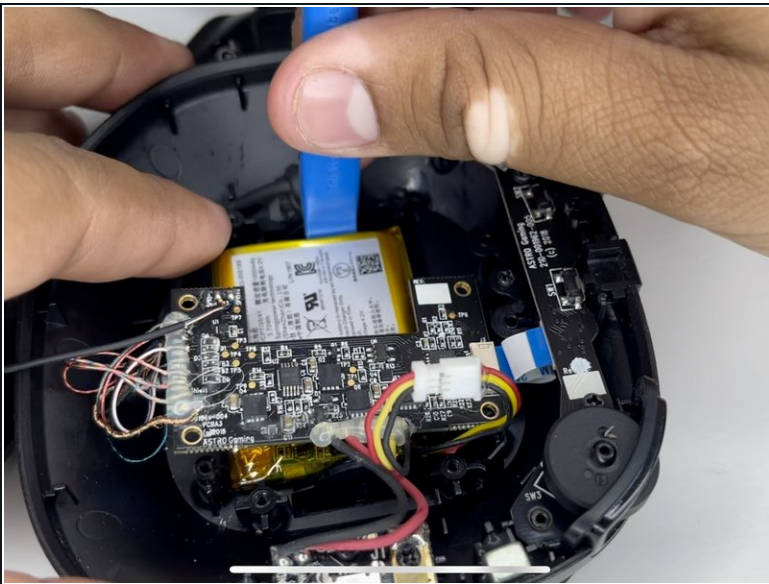

⚠ Be careful not to lift the speaker too quickly or too forcefully to prevent the wires from being pulled out of their connections.

Step 4

- Remove all four 1.5 mm screws holding the motherboard using the Phillips #00 screwdriver.
- Unplug the battery by pulling the plug.

Step 5

- Remove the old battery with a plastic opening tool.

⚠ Be careful to not puncture the battery or fold it.

To reassemble your device, follow these instructions in reverse order.

For optimal performance, after completing this guide, [calibrate](#) your newly installed battery.

Take your e-waste to an [R2 or e-Stewards certified recycler](#).
