

# iRobot Roomba 880 Cleaning Head Replacement

Replacement guide for the cleaning head in the Roomba 880

Written By: Allie Ahern

---

## INTRODUCTION

This guide will show you how to replace the whole Cleaning Head in the Roomba 880, which houses the Debris Extractors. Let's do it!

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Flathead Screwdriver](#) (1)
-

## Step 1 — Cleaning Head

- Flip the Roomba over, wheel-side up.
- Using a Phillips #1 screwdriver, loosen the four 15 mm screws illustrated. Two are located on the battery door, while two are on the bottom panel.
- Remove the battery door, pulling straight up from the two indents above the screws.

## Step 2 — Side Brush

- Using a flat head screwdriver, loosen the screw on the top of the side brush.
  - Remove side brush.
- i** The bottom panel cannot be removed without first removing the side brush, so make sure to do this first.

## Step 3 — Bottom Panel

- Pull up on the bottom panel to remove.

## Step 4 — Dust Bin

- Reach underneath the dust bin, press the bin removal button, and pull out.

**i** The bin removal button is located on the top edge of the bin.

## Step 5

- Using a Phillips #1 screwdriver, remove the four 10 mm screws shown.

## Step 6 — Remove Cleaning Head

- Remove the cleaning head by grabbing the two protruding tabs as shown, and pulling straight up.

To reassemble your device, follow these instructions in reverse order.
